

Crossing Sectors: Collaborating for Quality in Teacher Education in PIECCE

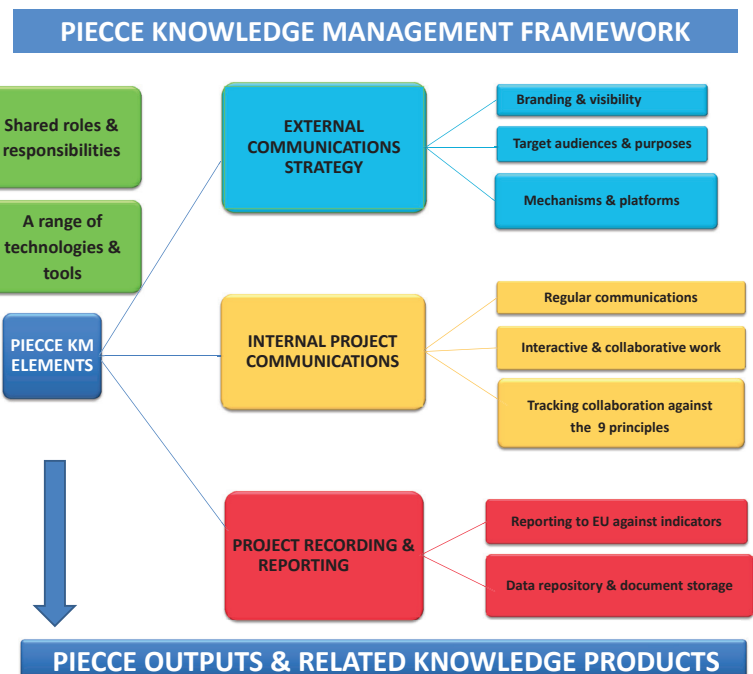

“It is so useful to get new and different perspectives on our discipline from those outside our own institutional settings. This has expanded our understandings of quality and common standards in ECCE teacher education .”

“Collaboration between different organisations is complex and time consuming. It has sometimes been difficult, but we have learned a lot about ourselves, our assumptions and our processes from the collaboration reflection sessions.”

“It is really refreshing to be part of a process through which the gap between higher education and NGOs narrows at every single meeting.”
